

TILE TO METAL ROOF FACTSHEET

Here's how we get your job done right the first time:

- Your old existing roofing tiles are removed and disposed
- All timber roof trusses are checked for rot or white ant damage
- All timber battens are replaced with metal battens to suit a metal roof
- Upgrading of roof tie down is effected as necessary
- Gable, barge capping rolls are installed
- Insulation or sarking is installed over roof battens (if part of scope of works)
- Full length roof sheets are set in place
- The ends of each roof sheet are bent back to prevent water back flow
- Ridge capping is installed
- Scribing is carried out to finish the roof professionally
- Once the roof is laid, the valley iron is trimmed to exactly the right width
- Your roof is cleaned
- All rubbish is removed and your property is left clean and tidy

We offer a **Ten (10) year workmanship warranty on re-roofs** and manufacturer's warranty (Zincalume and Colorbond) of up to twenty-five (25) years.

Why Choose Us?

- Professional workmanship
- Fully QBCC licensed and insured
- Master Builder member
